One on One

T6 One-on-One is all about *You!*

T6 now offers personalized one-on-one training!

Wouldn't it be great to have someone show you how to do all that cool stuff with your computer that everyone else is already doing, but you're afraid to ask how? Would you like to learn more about basic PC usage, Advanced PC options, using a digital camera with your PC, or how E-Mail or VoIP works? What about tips on saving money by shopping on the Web?

T6 has some very experienced Technicians that would like to offer you personalized, one-on-one training about these subjects and more. You can have a trained Technician at your disposal for 45 minutes, once a week for one full year! All this for only \$99 per year! This is for everyone, not just T6 Broadband customers. This would also be a great gift for someone just starting out with a new computer or high speed Internet.

To schedule your training session call us at 815-547-3885

How long could you be without your internet connection?

There's one thing we can all count on in this hi-tech world- it's not 'if' something is going to break down, it's 'when'. We work 7 days a week, 24 hours a day to keep our network running smoothly. Sometimes things happen beyond our control that creates Internet outages. This is why redundant Internet service is no longer an option- it is a necessity! Every T6 customer has 2 hours of nationwide dialup to use as back-up or when away from home. Please call Tech Support to access this benefit.

Business account or working from home? We may also provide DSL and T1 lines for your redundant service.

High Tech Tidbits

Can you believe in 1997, only 18% of America's households had internet access? The latest U.S. Census report (2003) now shows 62 million households, or 55%, have internet access. This report also shows 70 million households, or 62% of Americans, have 1 or more computers, up from 56% in 2001.
